Blake Aram Babikian

Somerville, MA • (978) 460-7731 • BlakeBabikian@gmail.com • BlakeBabikian.com

SUMMARY

Electrical professional with 5+ years in commercial construction — estimating, field installation, and controls integration. Used to being handed a desired outcome and figuring out how to make it work: signal types, wiring, relay configurations, controller terminations. CIS degree with full-stack software development experience.

PROFESSIONAL EXPERIENCE

New Age Electrical Services – Acton, MA
Estimator, Project Manager & Controls Electrician *June 2020 – Present*

• Estimate commercial electrical projects from drawings through completion — takeoffs, cost estimates, and scope letters. Have put together 120+ bid packages ranging from small fit-outs to a $2M apartment building.
• Ran a Tufts University controls project largely independently with two apprentices — evaluated existing equipment, determined cable types and signal requirements, wired and terminated to controllers, built as-built documentation, and coordinated with the controls tech to verify software matched field wiring.
• Controls electrician on commercial HVAC and mechanical systems — given a desired monitoring or control outcome, determine the integration approach: signal types, relay configurations, cable routing, and controller terminations, often working from equipment diagrams alone when project drawings are incomplete.
• Coordinate an ongoing service contract with the Town of Northborough — HVAC equipment upgrades across multiple municipal buildings, including site walks, estimating and field coordination.

TECHNICAL SKILLS

Electrical & Field
Power distribution, panel terminations, conduit and wire installation, equipment commissioning, system troubleshooting, fire alarm systems, low-voltage wiring

Software & Development
Python, Swift/SwiftUI, JavaScript, Node.js, React, Flask, MySQL, PostgreSQL, Docker, Nginx, Git, REST APIs, Oracle Cloud, Linux server administration

EDUCATION

Bentley University – Waltham, MA
Bachelor of Science, Computer Information Systems *September 2020 – May 2024*
Major GPA: 3.58 | Cumulative GPA: 3.21 | President's List & Dean's List

PROJECTS

The Oak Company – oak-us.com
Founder & Developer *August 2025 – Present*

• Built Oak, an iOS app for product discovery and reviews. Full-stack: Swift/SwiftUI frontend, Python Flask API, MySQL database hosted on Oracle Cloud with Nginx and SSL. Imported and normalized 24,000+ products and 87,000+ reviews from multiple data sources.

Book Up – book-up.net
Co-Founder & Lead Developer *August 2024 – December 2025*

• Developed a platform connecting musicians with venues for booking and payments. Node.js/React web app, Swift iOS app, Flask backend, Stripe payment integration, self-hosted MariaDB database on a personal NAS.

ADDITIONAL EXPERIENCE

Wolters Kluwer – Waltham, MA
Industry Engagement Intern *September 2023 – May 2024*

• Automated disaster recovery processes using Python and Bash within Docker containers, reducing manual intervention and cutting recovery times by 50%.
