Blake Aram Babikian

Somerville, MA • (978) 460-7731 • BlakeBabikian@gmail.com • BlakeBabikian.com

5+ years running commercial electrical projects from bid to close-out — estimating, stakeholder coordination, and scope management on jobs up to $500K. Controls integration across HVAC and mechanical systems, often working from equipment diagrams alone when drawings are incomplete. CIS degree with hands-on full-stack development: deployed production backends, managed databases, and built iOS apps from scratch.

PROFESSIONAL EXPERIENCE

Estimator & Project Manager, Controls Integration | New Age Electrical Services — Acton, MA
June 2020 – Present

- Estimated and managed 120+ commercial electrical projects — takeoffs, material pricing, scope letters, and bid packages for retail, municipal, federal, and multifamily work ranging from $5K fit-outs to a ~$500K federal data center bid (Army Corps of Engineers, NSSC Natick).
- Managed a 2000A service upgrade for a 10-tenant mixed-use property — developed scope of work and $77K bill of materials, coordinated with the architect, engineer, property owner, and utility on metering, disconnects, and phased tenant switchovers.
- Ran a Tufts University controls project with two apprentices — scoped existing systems, managed the install, built as-built documentation, and coordinated with the controls programmer to verify BAS software matched field wiring.
- Own a municipal service contract with the Town of Northborough — HVAC equipment upgrades across 4 town buildings. Handle site walks, estimating, scheduling, and field coordination.
- Controls integration on commercial HVAC systems — determine relay configurations, signal types, cable routing, and controller terminations for DDC/BAS systems, working from equipment submittals when project drawings are incomplete.
- Coordinate with general contractors, engineers, architects, property managers, vendors, and subcontractors across multiple concurrent projects in different states.

Industry Engagement Intern | Wolters Kluwer — Waltham, MA
September 2023 – May 2024

- Automated disaster recovery workflows using Python and Bash in Docker containers, reducing manual intervention and cutting recovery time by 50%.

SOFTWARE PROJECTS

The Oak Company | *oak-us.com*
August 2025 – Present

- Full-stack iOS app for product discovery and reviews. Swift/SwiftUI frontend, Python/Flask API on Oracle Cloud (Gunicorn, Nginx, SSL), MySQL database. ETL pipeline to import and normalize 24K+ products and 87K+ reviews from multiple sources.
- Set up and maintain the full production stack: Ubuntu VM, systemd services, Certbot SSL, Nginx reverse proxy, Tailscale networking to a self-hosted NAS database.

Book Up | *apps.apple.com/us/app/book-up/id6744000565*
August 2024 – December 2025

- Co-founded a musician/venue booking platform. Node.js/React web app, Swift iOS app, Flask backend, Stripe payments, self-hosted MariaDB on Synology NAS.

TECHNICAL SKILLS

Project Management: Estimating, scope development, bid packages, budget tracking, stakeholder coordination, vendor management, as-built documentation, federal contracting
Electrical & Controls: Power distribution (up to 2000A), DDC/BAS integration, HVAC controls, relay logic, signal types (4-20mA, 0-10V, dry contact), fire alarm, commissioning
Software: Python, Flask, Swift/SwiftUI, JavaScript, Node.js, React, MySQL, PostgreSQL, Docker, Nginx, Git, REST APIs, Linux, Oracle Cloud

EDUCATION

Bentley University | Waltham, MA
B.S. Computer Information Systems • May 2024 • Major GPA: 3.58 • President's List & Dean's List
